The University of Jordan

Accreditation & Quality Assurance Center

**COURSE Syllabus**

**Course Name: Pre-Calculus**
### Course Title

Pre-Calculus

### Course Number

(0331099)

### Credit Hours (Theory, Practical)

3

### Contact Hours (Theory, Practical)

3

### Prerequisites/Corequisites

None

### Program Title

B.Sc.

### Awarding Institution

The University of Jordan

### Faculty

Science

### Department

Mathematics

### Level of Course

College requirement

### Year of Study and Semester(s)

1st year, all Semesters

### Final Qualification

B.Sc.

### Other Department(s) Involved in Teaching the Course

None

### Language of Instruction

English

### Date of Production/Revision

1.11.2018

---

#### 16. Course Coordinator:

Office numbers, office hours, phone numbers, and email addresses should be listed.

#### 17. Other Instructors:

Office numbers, office hours, phone numbers, and email addresses should be listed.

#### 18. Course Description:

As stated in the approved study plan.

Algebraic expressions; factorization; exponents; logarithms; Cartesian coordinates; straight lines; parabolas; equations: linear, linear and quadratic, exponential, logarithmic; inequalities; functions; sequences; Binomial theorem.
A. Aims:
This course aims to prepare students, with weak mathematical background, for studying calculus. Students should be able to
1. Solve algebraic equations.
2. Find equation of a straight line.
3. Solve exponential and logarithmic equations.

B. Intended Learning Outcomes (ILOs): Upon successful completion of this course students will be able to ...

A. Knowledge and Understanding Skills: Student is expected to
A1. Identify the equation of a straight line.
A2. Identify exponential and logarithmic equations.

B. Intellectual Analytical and Cognitive Skills: Student is expected to
B1. Use the Binomial Theorem.

C. Subject- Specific Skills: Student is expected to
C1. Solve algebraic equations (linear, quadratic).
C2. Factor an algebraic expression.
C3. Solve exponential and logarithmic equations.

D. Creativity /Transferable Key Skills/Evaluation: Student is expected to
D1. Sketch graphs of simple functions on the Coordinate plane.
D2. Sketch the graph of exponential and logarithmic functions

20. Topic Outline and Schedule:

<table>
<thead>
<tr>
<th>Topic</th>

</table>

21. Teaching Methods and Assignments:

Development of ILOs is promoted through the following teaching and learning methods:

- Class time will be spent on lecture as well as discussion of homework problems and some group work.
- To actively participate in class, you need to prepare by reading the textbook and doing all assigned homework before class (homework will be assigned each class period, to be discussed the following period).
- You should be prepared to discuss your homework (including presenting your solutions to the class) at each class meeting - your class participation grade will be determined by your participation in this.
Opportunities to demonstrate achievement of the ILOs are provided through the following assessment methods and requirements:

- You are encouraged to work together with other students and to ask questions and seek help from the professor, both in and out of class.

<table>

</tbody>
</table>

23. Course Policies:

According to university regulations, attendance is mandatory. If a student is unable to attend a class, then he/she should contact the instructor. If a student misses more than 10% of the classes without excuse, then he/she will be assigned a failing grade in class.

In cases of extreme emergency or serious illness, the student will be allowed to make up the missed exams. Times and dates for make up exams will be assigned latter.

There are severe sanction for cheating, plagiarizing and any other form of dishonesty. The university regulations on cheating will be applied to any student who cheats in exams or on homework.

24. Required equipment:

Data Shows

25. References:

A- Required book(s), assigned reading and audio-visuals:
