JOB/POSITION HISTORY

University of Jordan

3/2014-present Associate Professor, Department of Biological Sciences
9/2014-8/2015 Chair of the Department of the Biological Sciences
2/2014-present Electrophysiology Consultant/ Cell Therapy Center
9/2007-3/2014 Assistant Professor, Department of Biological Sciences

North Dakota State University

8/2006-5/2007 Assistant Professor, Department of Pharmaceutical Sciences
1/2006-5/2006 Lecturer, Department of Pharmaceutical Sciences

University of North Dakota

5/2005-12/2005 Postdoctoral fellow, Department of Pharmacology, Physiology and Therapeutics

North Dakota State University

1999-2005 Graduate Research Assistant, Department of Pharmaceutical Sciences

Amman University

1997-1998 Instructor, Department of Medical Analysis

Al-Zaytoonah University

1995-1997 Lecturer, Faculty of Pharmacy

University of Jordan

1992-1995 Graduate Teaching Assistant, Department of the Biological Sciences

EDUCATION

North Dakota State University, Ph.D. Pharmacology, Fargo, North Dakota, USA, 2005
Dissertation "Physiological Studies of Cellular Adaptations Following Chronic Drug Exposure"

University of Jordan, M.Sc. Biology (Physiology), Amman, Jordan, 1995
Thesis "Physiological Effects of Selected Flavonoids on Smooth Muscle and Perfused Heart Isolated from Rat: Structure-Activity Relationship"

University of Jordan, B.Sc. Biology, Amman, Jordan, 1992

HONORS

- Faculty Development Travel Award, North Dakota State University, 2007
- Faculty Development Travel Award, North Dakota State University, 2006

- North Dakota Board of Higher Education Scholarship (Spring 2005)
- Rho Chi Pharmacy Honor Society, North Dakota State University, 2001

TEACHING EXPERIENCE

Associate Professor 2014-present
University of Jordan
Amman, Jordan

Developed and taught course in:

- Physiology for Biology and Medical Technology students
- Advanced Physiology for graduate students
- Molecular Physiology for graduate students
- General Biology 101 and 102

Assistant Professor 2007-20014
University of Jordan
Amman, Jordan

Courses taught included:

- Physiology for Biology and Medical Technology students
- Pathophysiology for Pharmacy students
- Advanced Physiology for graduate students
- Molecular Physiology for graduate students
- Endocrinology for Biology and Medical Technology students
- Physiology for Paramedic students
- General Biology 101 and 102
- Introductory Biology for Premedical students

Assistant Professor 2006-2007
North Dakota State University
Fargo, North Dakota, USA

- Developed and taught Pathophysiology for PharmD students
- Coordinator for Special Topics in Pharmaceutical Sciences

Instructor 1997-1998
Amman University
Amman, Jordan

- Taught General Biology 101 and 102 labs for Pharmacy and Medical Technology students

Lecturer 1995-1997
Al-Zaytoonah University
Amman, Jordan

- Taught General Biology 101 and 102 labs for Pharmacy and Medical Technology students
- Developed and taught Anatomy and Physiology labs for Medical Technology students

Teaching Assistant 1992-1995
University of Jordan
Amman, Jordan

- Taught General Biology Labs 101 and 102
- Taught Animal Physiology Lab
- Taught Plant Physiology Lab

GRADUATE STUDENTS

Advisor/Co-advisor

- Fuad Mansour, Ph.D., “The Effect of Long Term Hypoxia on Cancer Stem Cells and The Impact of Developed Cells Secretions on Angiogenesis Using Human Umbilical Vein Endothelial Cells (HUVEC)”, April 2019, Major advisor
- Sophia Al-Adwan, Ph.D., “Influence of Diabetes Mellitus on the Angiogenicity Potential of Bone Marrow Derived Mesenchymal Stem Cells: An miRNA Perspective”, February 2019, Major advisor
- Heba Khlaif, M.Sc., “The Impact of Cerebrospinal Fluid from Multiple Sclerosis Patients on Therapeutic Capacity of Mesenchymal Stem Cells”, expected defense date: Fall 2019, Major advisor
- Laila Baqlouq, “Dermining the Relative Gene Expression Level of Hypoxia Related Genes in Different Cancer Cell Lines”, April 2019, Co-advisor
- Bayan Almomany, Ph.D., “The role of dihydrotestosterone in influencing chemosensitivity of triple-negative breast cancer cells by regulating ABCG2 transporter via microRNA: a possible therapeutic strategy”, expected defense date: Fall 2019, Co-advisor
- Laiali Quraan, Ph.D., “Dietary Omega-3 Fatty Acids Effects on Hippocampal Brain-Derived Neurotrophic Factor (BDNF) Level, Selective Oxidative Stress Enzymes, Inflammatory Gene Expression of Selected Cytokines, Learning and Memory Impairment Induced by Post-Traumatic Stress Disorder in Rat Model”, expected defense date: Fall 2019, Co-advisor
- Suzie Rababah, Ph.D., “Changes in the Gene Expression of Matrix Metalloproteinases in the Brain Hippocampus after Exposure to Psychosocial Stress in Rat Model: The Neuroprotective Role of L-Carnitine”, expected defense date: Fall 2019, Co-advisor
- Nihad Othman, Ph.D., “Role of Androgens in Differential Profiling of miRNA in Relation to the Biology of Triple Negative Breast Cancer,” July 2017, Co-advisor
- Dana Hattab, Ph.D., “The Effect of Oxytocin on Mesenchymal Stem Cells Isolated from Human Umbilical Cord: Gene Expression Analysis and Cardiomyocytes Differentiation,” July 2016 , Co-advisor
- Zina Habib, M.Sc., “Antiangiogenic Activities of the Hydro-alcoholic Extract of *Trigonella foenum-graecum*,” December 2014, Major advisor

Committee Member/External Examiner

- Fatima Kareem, M.Sc., “Structural and Physiological Study of the Effect of Benton on the Deoxynivalenol (DON)-induced Toxicity in Domestic Fowl” April 2019, committee member
- Bayan Al-Hourani, M.Sc., “The Effect of Poly Lactic-Co-Glycolic Acid Microcarriers on Proliferation and Differentiation of Wharton’s Jelly Mesenchymal Stem Cells”, July 2018, External examiner
- Suzanne Sober, M.Sc., “Comparison of Cell Surface Markers Between Mesenchymal Stem Cells from Different Sources and fibroblasts” January 2018, External examiner
- Farah Mubarkeh, M.Sc., “The Effect of Different Concentrations of Pooled Human Platelet Lysate on Urinary Mesenchymal Stem Cells Proliferation into Urothelial Cells”, August 2017, External examiner
- Samar Tarazi, M.Sc., “The Effect of TGF-beta, EGF and VEGF Growth Factors on The Proliferation and Differentiation of Mesenchymal Human Urine Stem Cells into Urothelial Cells”, August 2017, External examiner
- Hashem Al-Mousa, M.Sc., “Investigating the potential genotoxic effect of etoposide on human lymphocytes”, May 2017, committee member
- Aya Alwais, M.Sc. “Study the Relationship Between Trace Elements, Hormones and Interlukin-6 among Jordanian Infertile Women,” February 2016, External examiner
- Aman Ishaqat, M.Sc. “Phytochemical Screening and Evaluation of Antioxidant, Antimicrobial, Antiangiogenic and Antiproliferative (Against Different Breast Cancer Cell Lines) Activities of the Leaves of *Elaeagnus angustifolia* Grown in Jordan,” August 2015,

- committee member
- Amani Harb, M.Sc., “Effects of Betacaryophyllene and Eugenol as Antioxidant Compounds on Hypercholesterolemic Rats”, 2015, committee member
- Abeer Harb, M.Sc., “Effects of trans-resveratrol, isolated from *Smilax aspera*, on smooth muscle, blood pressure, inflammation in rats and nociception in mice,” 2008, committee member

ADMINISTRATIVE EXPERIENCE

Chair

Department of Biological Sciences, University of Jordan 9/2014-8/2015

Director for the four academic programs offered by the department: B.Sc. in Biology, B.Sc. in Medical Analysis, M.Sc. and Ph.D. in Biology.

- Conduct regular department meetings; establish department committees as needed and oversee the work
- Direct and oversee all matters related to advising and counseling students
- Supervise and evaluate support staff
- Submitting course schedules for various terms
- Prepare the Department's Annual Report

RESEARCH EXPERIENCE

Faculty Member

9/2007-present

University of Jordan

Department of Biological Sciences

- Established a research lab equipped for cell culture studies
- Established an electrophysiology lab equipped to carry patch-clamp studies using both conventional and automated methods

Grant support and active research projects include:

- “Profiling the expression of genes involved in modulating the hypoxia-induced angiogenesis impact of hypoxic cancer stem secretions on Human Umbilical Vein Endothelial Cells (HUVEC). Funded by the University of Jordan Deanship of Academic Research, ~ 20,000 JD (4/2018-Active), PI
- “Determining the gene expression changes that cause chemoresistance in chronic hypoxic MCF7 Breast Cancer Cell line”, Funded by Scientific Research Support Fund/ Ministry of Higher Education and Scientific Research Amman, Jordan ~ 37,850 JD (Active), PI
- “Antiangiogenic Activities of the hydro-alcoholic extracts of *Achillea* species grown in Jordan” Funded by the University of Jordan Deanship of Academic Research, ~ 30,000 JD (Active), PI
- “The Effect of Oxytocin on Mesenchymal Stem Cells Isolated From Human Umbilical Cord and Amniotic Fluid: Gene Expression Analysis and Cardiomyocytes Differentiation”, Funded by Scientific Research Support Fund/ Ministry of Higher Education and Scientific Research Amman, Jordan ~ 62,000 JD (Active), Co-investigator (PI: Dana Hattab)
- “The effects of topically applied agents on extra- and intraoral wound healing in a rat model”, Funded by the University of Jordan Deanship of Academic Research, ~ 23,000 JD (6/11-12/14), PI
- Polymorphic CYP2A6 and Risk of Tobacco-Dependence. In collaboration with Dr. Malek Alzihlif, Collage of Medicine, University of Jordan, Amman, Jordan (active)
- Antioxidant, antiproliferative and antiplatelet activities of selected Jordanian plants. In collaboration with Dr. Fatma Afifi, Collage of Pharmacy, University of Jordan

Post-doctoral Fellow

5/2005-12/2005

University of North Dakota
School of Medicine and Health Sciences
Department of Pharmacology, Physiology and Therapeutics
Prof. Van Doze, Lab Director

Electrophysiology (patch clamp technique) and molecular biology (single cell RT-PCR technique) approaches were used to:

- study the catecholaminergic modulation of hippocampal excitability
- determine the mechanism underlying the α_2 adrenergic receptor-mediated anticonvulsant actions of norepinephrine in the hippocampal CA3 region

Pre-doctoral Student

2002-2005

North Dakota State University
College of Pharmacy, Nursing and Allied Sciences Department of Pharmaceutical sciences
Prof. John Wagner, Dissertation Advisor

Patch clamp technique was used to record from the CA1 pyramidal neurons in rat hippocampal slices in an attempt to:

- Characterize the effects of cocaine on the hippocampus and the molecular mechanisms underlying these effects.
- Study the effect of cocaine on synaptic plasticity

Pre-doctoral Student

1999-2002

North Dakota State University
College of Pharmacy, Nursing and Allied Sciences
Department of Pharmaceutical sciences
Prof. Stephen O'Rourke, Lab Director

To study nitrate tolerance in blood vessels focusing on the role of K-channels in nitroglycerin-induced relaxation in tolerant blood vessels. The work consisted of two phases:

- Phase 1 was to study nitroglycerin tolerance *in vitro* in porcine coronary arteries using the organ bath technique.
- Phase 2 was to develop an *in vivo* animal model for nitroglycerin tolerance induction and then studying tolerance in isolated rat aorta.

M.Sc. Student

1992-1995

The University of Jordan
Department of Biological Sciences
Prof. Shtaywy Abdalla, Thesis advisor

- The effects of eleven selected flavonoids on isolated rat smooth muscles (ileum, aorta, and urinary bladder) and perfused heart was evaluated
